

SURE PRIME **WHITE PRIMER**

Diamond SURE PRIME White Primer is a good-quality primer. It dries to the touch in fifteen (15) minutes without leaving strong chemical odours or toxic residues. It is lead and mercury-free, suitable for use on cement, bricks, cardboard, gypsum, or untreated wood. The high solid concentration in the primer ensures good coverage with optimum performance.

Product Preparation:

Shake the can for a few minutes before opening, then mix it to a uniform consistency.

Surface Preparation:

It is crucial to remove all dust, grease, clay, or any foreign material before applying primer. On newly cemented surfaces, it will be necessary to prime the walls using no more than 0.5 litres of clean water per 18.93 litres of Diamond White Primer. Apply a second coat one hour later without thinning for the best results. On chalky surfaces, it will be necessary to remove all loose materials by scrubbing with a stiff brush or broom, and rinsing with clean water.

Application Suggestions:

Use a nylon or polyester brush. Use medium nap rollers for the best results. If you wish to apply using a spray canister, you may add 1.25 litres of clean water per 18.93 litres of primer.

Coverage:

Covers approximately 167m² per 18.93 litres. However, this depends on the porosity and texture of the surface.

Drying Time:

To touch, 15 minutes; to recoat, 60 minutes.

NOTE: (Ageing and external conditions beyond our control prohibit guaranteeing an exact match to the colour chart).

Notice:

Due to certain application conditions that are beyond the control of the manufacturer - Diamond Paint Manufacturing Co. Ltd. - its liability is limited to the replacement of the product only.

Caution:

Do not ingest. Close the container after use. Keep out of the reach of children. Do not refrigerate. It is lead and mercury-free, non-toxic, and environmentally safe.
